Pricing notes

Proposed prices

These are recommended South African price points for commercial planning and quoting once the applicable release and service scope are confirmed. A “From” price is the minimum proposed price for a scoped quote.

VAT

Each price pair shows the amount excluding VAT first and the amount including VAT second, using the workbook's 15% standard-rate assumption for standard-rated supplies by a VAT-registered vendor. SARS VAT guidance

Recurring totals

Business and enterprise subscriptions use a 12-month term. Monthly figures for annual plans are monthly equivalents. Per-unit plans show one unit or the stated minimum. Fees, allowances and unit prices follow the selected tier.

Once-off purchases and maintenance

Perpetual licences cover continued use of the purchased version. Annual maintenance applies to the editions shown. Setup, licences and usage charges are listed separately where applicable.

Cloud and usage charges

Variable charges depend on actual usage. Processor fees, third-party charges, and unpriced integrations or overages are quoted separately.
