Plan your next step 27

A USEFUL FIRST CONVERSATION

Start with the work.

Choose a system by the problem you need to solve, then confirm its current scope with our team.

01 **Describe the bottleneck.**
What takes too long? Which records, decisions or responsibilities are difficult to follow?

02 **Find a relevant system.**
Read the description, intended audience and practical conversation starter on each product page.

03 **Check availability.**
Each entry carries its existing catalogue status. A packaged build or demonstration does not mean general availability.

04 **Discuss the fit.**
Tell us about your team, platforms, integrations and constraints so that evaluation scope can be agreed.

> **READ THE STATUS ON EVERY PAGE**
>
> Release under review, in development, prototype and planning labels describe different stages. Confirm access and suitability before relying on a system.

This guide follows the existing product catalogue. Choose any of the 11 South African languages and download the matching PDF or offline edition.

MUSIC & MEDIA

GMAS

Godfathers Media Automation System

In active development

A music and media platform bringing catalogue operations, listening and radio experiences together.

CATALOGUE
CREATE
LISTEN

Who it is for

Music businesses, catalogue teams and listeners.

Areas of focus

- Music catalogue and media administration
- Music playback and listening experiences
- Radio programming and access

> **A CONVERSATION STARTER**
>
> You manage a music catalogue and want to discuss how catalogue work connects to listening and radio.

Keep the work behind a music catalogue connected to the listening experience.

Availability · In active development

Playback and radio work has been demonstrated. Platform transition and further development are ongoing. Artist distribution and other planned services are not confirmed as available.

Music rights remain with The Godfada Recording Label and the relevant rights holders.

View product profile ↗

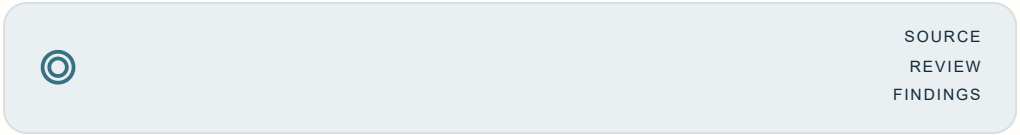

DATA & INVESTIGATIONS

DAIT

Data Analysis Intelligence Tool

Release under review

An analysis workspace for turning source data into structured findings and reports.

Who it is for

Analysts, investigation teams and organisations reviewing complex records.

Areas of focus

- Data preparation and analysis workflows
- Source-linked review of findings
- Evidence-backed reporting

> **A CONVERSATION STARTER**
>
> Your team has complex records to review and needs a clearer route from source material to findings.

Support clearer reviews by keeping analysis connected to its source material.

Availability · Release under review

Windows installer builds exist. Release readiness is still being reconciled; contact us to discuss evaluation scope and current availability.

View product profile ↗

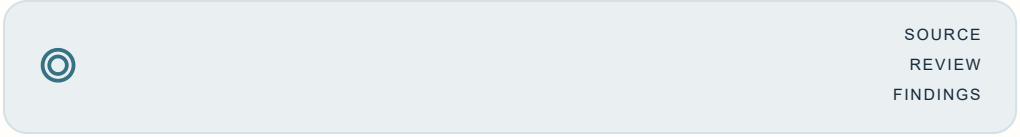

DATA & INVESTIGATIONS

TFIT

Tokoloshe Forensic Investigation Tool

Release under review

A forensic investigation workspace focused on organised evidence and traceable case work.

Who it is for

Forensic practitioners and authorised investigation teams.

Areas of focus

- Case and evidence organisation
- Traceable investigation workflows
- Review and reporting support

> **A CONVERSATION STARTER**
>
> You are planning an authorised investigation and need to assess how case material could be organised.

Bring case material and investigation activity into a more structured review process.

Availability · Release under review

A recent packaged build has recorded test evidence. Final acceptance and the current installer release remain under review. Suitability must be assessed for the intended investigation.

View product profile ↗

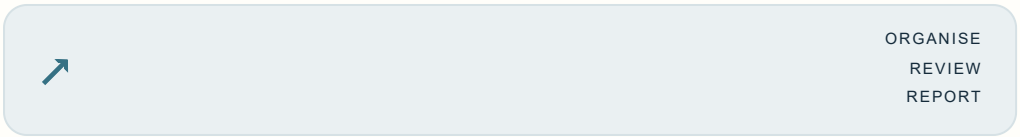

BUSINESS OPERATIONS

Absolute Mail

Email workspace

Release under review

A desktop email workspace for managing communication across connected accounts.

Who it is for

Individuals and teams working with multiple email accounts.

Areas of focus

- Connected email account management
- Email synchronisation
- Desktop communication workflows

> **A CONVERSATION STARTER**
>
> You work across several email accounts and want to discuss a more connected desktop workspace.

Reduce the friction of moving between accounts and day-to-day correspondence.

Availability · Release under review

Windows installers have been produced. Current release acceptance and distribution arrangements are being confirmed. Enquire about compatibility with your email provider.

View product profile ↗

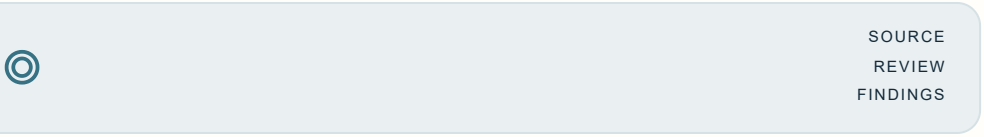

DATA & INVESTIGATIONS

FIMS

Forensic Investigation Management System

Availability under review

Case management software for coordinating investigation work and supporting evidence.

Who it is for

Investigation managers, case teams and review personnel.

Areas of focus

- Investigation case management
- Evidence handling workflows
- Case progress and review

> **A CONVERSATION STARTER**
>
> You coordinate a case team and need to follow responsibilities, evidence and review progress.

Make case progress and responsibility easier to follow across an investigation.

Availability · Availability under review

A production release is recorded in project history. Current deployment and availability are being reconfirmed before further access is offered.

View product profile ↗

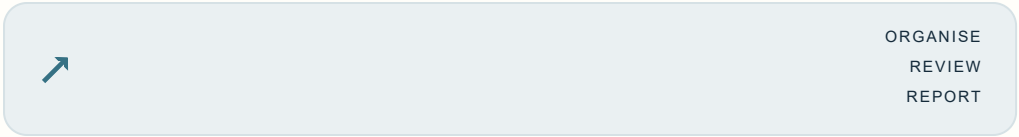

BUSINESS OPERATIONS

ADIROS

Absolute Development Intelligence & ROI Operating System

Release under review

Portfolio oversight for understanding software delivery, development costs and investment outcomes.

Who it is for

Software teams, portfolio managers and business leaders.

Areas of focus

- Project and portfolio oversight
- Development cost and billing review
- Delivery and investment reporting

> **A CONVERSATION STARTER**
>
> You oversee software projects and want to discuss development spending alongside delivery progress.

Bring delivery progress and development spending into the same management conversation.

Availability · Release under review

A Windows installer build exists. Edition details and current release acceptance are being confirmed. Contact us to discuss your portfolio requirements.

View product profile ↗

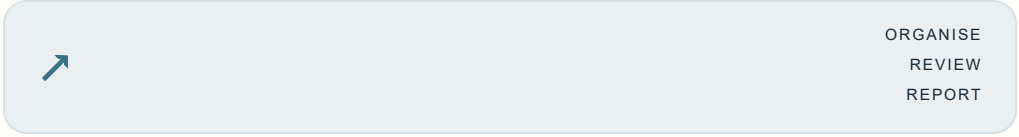

BUSINESS OPERATIONS

AAS

Advanced Accounting System

Release under review

Accounting software covering financial records, review workflows and management reporting.

Who it is for

Finance teams, accountants and business administrators.

Areas of focus

- Accounting records and period close
- Receivables and payables workflows
- Financial and management reporting

> **A CONVERSATION STARTER**
>
> Your finance team wants to assess accounting records, review responsibilities and management reporting.

Support more consistent financial operations and clearer review responsibilities.

Availability · Release under review

Windows packaging exists. Production provider connections and deployment acceptance remain conditional. No external filing or regulatory certification is implied.

View product profile ↗

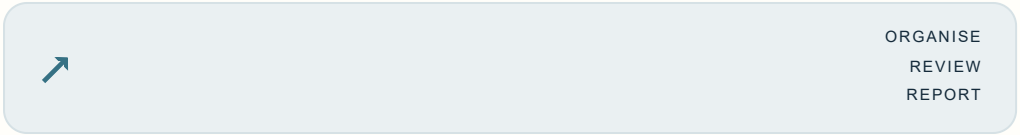

BUSINESS OPERATIONS

ATPS

Automated Tender Proposal and Submission

Release under review

A tender preparation system supporting proposal work and submission readiness.

Who it is for

Bid teams, procurement specialists and organisations responding to tenders.

Areas of focus

- Tender and proposal preparation
- Submission readiness review
- Tender workflow coordination

> **A CONVERSATION STARTER**
>
> Your bid team needs to organise proposal preparation and review what is required before submission.

Organise proposal preparation and make submission requirements easier to review.

Availability · Release under review

Release and handover records exist. Current package acceptance and external portal support must be confirmed for each intended use; automatic portal submission is not promised.

View product profile ↗

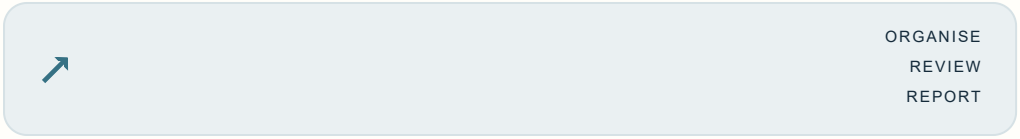

BUSINESS OPERATIONS

Absolute HRM

Human Resources Management

Release under review

A recruitment-agency HR workspace for coordinating jobs, candidates, interviews, placements and people administration.

Who it is for

HR teams, managers and business administrators.

Areas of focus

- Human resources administration
- HR workflow coordination
- Management oversight

> **A CONVERSATION STARTER**
>
> Your recruitment agency needs to coordinate candidates, interviews, placements and people administration.

Bring routine people administration into a more organised working environment.

Availability · Release under review

A Windows installer and release records exist. Current edition, deployment arrangements and acceptance require confirmation.

View product profile ↗

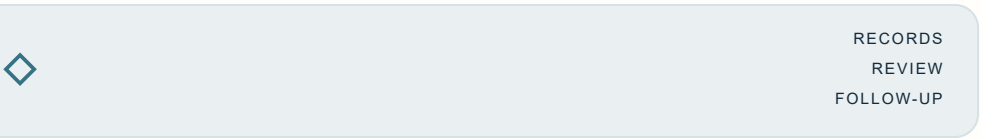

VEHICLE OPERATIONS

VATP / AutoTrack

Vehicle Administration and Theft Prevention

Prototype / evaluation

A vehicle administration project exploring organised vehicle records and theft-prevention workflows.

Who it is for

Vehicle administrators, fleet teams and vehicle owners.

Areas of focus

- Vehicle administration workflows
- Vehicle record review
- Theft-prevention workflow development

> **A CONVERSATION STARTER**
>
> You administer vehicles and want to evaluate a structured approach to vehicle records and follow-up work.

Bring vehicle-related information and follow-up work into a shared administration process.

Availability · Prototype / evaluation

A Windows reference package exists. Current workflows include demonstration data; production identity and authorisation are still required. This is not a live tracking or recovery service.

View product profile ↗

MUSIC & MEDIA

G-DAW

Godfathers Digital Audio Workstation

Prototype / evaluation

A desktop audio production project for music creation workflows.

CATALOGUE
CREATE
LISTEN

Who it is for

Music producers and audio creators.

Areas of focus

- Desktop audio production
- Music creation workflows

> **A CONVERSATION STARTER**
>
> You produce music and want to explore the scope of a desktop audio-production project.

Develop a dedicated working environment for audio production.

Availability · Prototype / evaluation

Windows installer packages exist. Current functional acceptance and supported production workflows have not been confirmed; enquire about the project before relying on it.

Music rights remain with The Godfada Recording Label and the relevant rights holders.

View product profile ↗

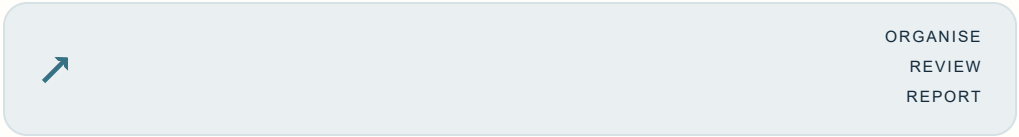

BUSINESS OPERATIONS

Advanced Payroll

Advanced Payroll Systems

In development

A South Africa-focused payroll project supporting calculation review and governed payroll workflows.

Who it is for

Payroll teams, employers and finance administrators.

Areas of focus

- Payroll calculation and review
- Approval and exception workflows
- Payroll reporting and administration

> **A CONVERSATION STARTER**
>
> Your payroll team wants to discuss calculation review, approvals and exception handling.

Make payroll work easier to review before approval and external processing.

Availability · In development

An implemented verification baseline exists. External submissions and production acceptance are not complete. It is not offered as a certified filing service.

View product profile ↗

IN DEVELOPMENT

NAPS360

National Automated Procurement System 360

In active development

Procurement software supporting planning, bid evaluation and contract monitoring workflows.

+

EXPLORE
DISCUSS
EVALUATE

A CONVERSATION STARTER

Your procurement team wants to discuss the planning, evaluation and contract-monitoring work it needs to support.

Availability · In active development

Implementation and automated API test evidence are recorded. External integrations and full acceptance remain subject to verification; no government certification or general availability is implied.

View catalogue entry ↗

IN DEVELOPMENT

AIPS

Advanced IP Protection System

In development

An intellectual property administration and protection project.

+

EXPLORE
DISCUSS
EVALUATE

A CONVERSATION STARTER

You need to organise intellectual property administration and want to discuss the project scope.

Availability · In development

Implementation and service scope are still being confirmed. No legal protection or registration outcome is promised.

View catalogue entry ↗

IN DEVELOPMENT

AbsolutePay

Payments project

Not available for production

A payments system under development.

+

EXPLORE
DISCUSS
EVALUATE

A CONVERSATION STARTER

You are researching future payment requirements and want to understand the development roadmap.

Availability · Not available for production

The production release gate has not been cleared. No live payment service is offered here.

View catalogue entry ↗

IN DEVELOPMENT

PCS

Probity Check System

Planning stage

A planned system for supporting probity review workflows.

+

EXPLORE
DISCUSS
EVALUATE

A CONVERSATION STARTER

You are planning a probity review process and want to discuss requirements before a system is available.

Availability · Planning stage

Planning material exists; an operational application has not been verified.

View catalogue entry ↗

IN DEVELOPMENT

Absolute Identity

Shared identity platform (Absolute ID)

In development

A shared identity and biometric-verification architecture under development for portfolio applications.

+

EXPLORE
DISCUSS
EVALUATE

A CONVERSATION STARTER

Your organisation is considering shared identity requirements across portfolio applications.

Availability · In development

Planning and local implementation checkpoints exist. Integration coverage and production availability are not confirmed. Sign in with Absolute is a shared capability, not an additional application in this catalogue.

View catalogue entry ↗

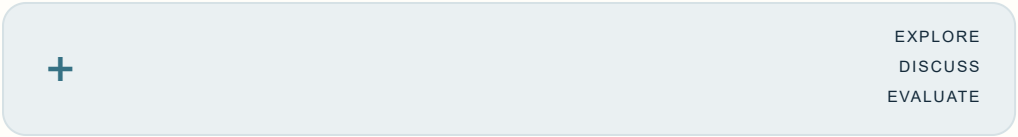

IN DEVELOPMENT

AICS

Advanced Insurance Claims System

In development

An insurance claims workspace being developed for claims administration, supporting evidence and review workflows.

A CONVERSATION STARTER

Your claims team needs to coordinate supporting evidence and claims-review responsibilities.

Availability · In development

Application-service implementation is recorded. Complete workflow acceptance and release availability remain unconfirmed.

View catalogue entry ↗

IN DEVELOPMENT

DMRIS

Digital Marketing Revenue Intelligence System

In development

A system being developed to connect marketing activity, attribution and commercial reporting.

+

EXPLORE
DISCUSS
EVALUATE

A CONVERSATION STARTER

Your marketing team wants to explore how activity, attribution and commercial reporting could connect.

Availability · In development

Local implementation and verification checkpoints exist. Planned business workflows should not be treated as generally available services.

View catalogue entry ↗

IN DEVELOPMENT

Mzanzi Smart Shopper

Household shopping workspace

In development

A household shopping application for organising shopping lists, retailer information and order review.

EXPLORE
DISCUSS
EVALUATE

A CONVERSATION STARTER

Your household wants to discuss a workspace for shopping lists and retailer information.

Availability · In development

Desktop source and packaging records exist. Retailer support, payment processing and fulfilment availability require confirmation.

View catalogue entry ↗

IN DEVELOPMENT

FUAS

Full Union Administration System

In development

A union administration workspace for membership records, cases, grievances, dues and reporting.

+

EXPLORE
DISCUSS
EVALUATE

A CONVERSATION STARTER

Your union needs to organise membership administration, cases, grievances and dues reporting.

Availability · In development

An implemented local workspace and demonstration workflows exist. Current release acceptance and deployment availability require confirmation.

View catalogue entry ↗

IN DEVELOPMENT

ETCSA

Expert Tax Consultant SA

In development

A South Africa-focused tax workflow project for organising tax review, calculations and reporting.

+

EXPLORE
DISCUSS
EVALUATE

A CONVERSATION STARTER

Your tax team wants to discuss a structured workflow for review, calculations and reporting.

Availability · In development

Local application source and validation tools exist. Tax accuracy, current regulatory coverage and external filing support require professional review and are not certified by this listing.

View catalogue entry ↗

IN DEVELOPMENT

G-FLA

FL Studio automation project

In development

A desktop music-production project for MIDI generation, automation planning and release-package preparation.

+

EXPLORE
DISCUSS
EVALUATE

A CONVERSATION STARTER

You create music in FL Studio and want to discuss MIDI and production-automation requirements.

Availability · In development

Local application source and process endpoints are documented. Supported FL Studio workflows and current release acceptance require confirmation.

View catalogue entry ↗

LET US UNDERSTAND YOUR WORK

A better brief. A useful next step.

Tell us which system interests you and what your team needs to achieve. We can discuss scope, availability and an appropriate evaluation.

01 **Your organisation and team.**
Who will use the system, and who reviews or approves the work?

02 **Your current process.**
What tools, records and reporting do you use? Where does the process slow down?

03 **Your requirements.**
Which platforms, integrations and access boundaries matter?

04 **Your priorities.**
What would a useful evaluation need to demonstrate?
